YOUR NEW CHALLENGE?

BACKEND DEVELOPER (m/f/d)

We are looking for a highly motivated Backend Developer who joins us on our way towards a climate-friendly and data-driven transport sector.
Do you want to become part of our mission to get transport emissions to net-zero by enabling our logistics clients to make the right decisions?

WHAT WE OFFER YOU

- Inspiring work environment in the in the beautiful Speicherstadt
- The opportunity to quickly take responsibility and bring in your ideas
- Active support in learning new skills quickly
- A lot of flexibility in the design of your own tasks
- Exciting and challenging tasks in a motivating working atmosphere

YOUR ROLE

- You take responsibility for a wide range of tasks around API- & backend development, using the latest frameworks and technologies
- You develop new data-driven features for our emissions management WebApp & proactively contribute ideas for continuous improvement
- You are part of our diverse SCRUM team to further develop system architecture and technical implementation of new product features
- You enjoy thinking along to create data structures for the functionality and usability from a user perspective

YOUR PROFILE

- You are proficient in Python (Flask, Django) and API-based software
- You have experience in building and running SaaS applications, ideally in a B2B or logistics environment
- You are an expert in CI/CD and cloud-based infrastructure
- B.Sc./M.Sc. in (business) computer science or comparable and at least 2 years of full-time practical experience
- You are a team-player and highly motivated to join our mission
- And finally, you have a good sense of humor 😊
