YOUR NEW CHALLENGE?
DATA ENGINEER (m/f/d)

We are looking for a highly motivated and analytical Data Engineer who joins us on our way towards a climate-friendly and data-driven transport sector. Do you want to become part of our mission to get transport emissions to net-zero by enabling our logistics clients to make the right decisions?

WHAT WE OFFER YOU

- Inspiring work environment in the in the beautiful Speicherstadt
- The opportunity to quickly take responsibility and bring in your ideas
- Active support in learning new skills quickly
- A lot of flexibility in the design of your own tasks
- Exciting and challenging tasks in a motivating working atmosphere

YOUR ROLE

- You design and implement cloud-based data architectures, pipelines, and efficiently handle large amounts of data
- You collaborate closely with project/product management and data scientists to find strategically optimal solutions
- You structure and link data sources, think ahead and outside the box
- You take responsibility for the functionality and operations of data pipelines from proof-of-concept to in-production solutions
- You have a sense for practicable solutions and fast development steps for the respective purpose

YOUR PROFILE

- You have at least 2 years of experience as IT Architect, Data Engineer, Cloud, Business Intelligence or Analytics Consultant
- You are familiar with cloud architectures and DevOps (Azure, AWS).
- You are familiar with database systems, data warehousing, data lakes and ELT/ETL pipelines
- You have excellent communication skills in German and English
- You are a team-player and highly motivated to join our mission
- And finally, you have a good sense of humor 😊
