

## Data Analyst (m/f/d) – Green Transportation

We are looking for highly motivated people to join us in making the supply chain and logistics sector more climate-friendly and data-driven. Our goal is to develop innovative solutions for sustainable, digitalized transport chains and to support our customers in their transformation to data-driven organizations.

### What we offer:

- Fast and direct decision-making processes and a lot of flexibility
- Varied projects with the focus on sustainable logistics
- Our ambition is that you learn new skills faster and develop them in a more focused way than anywhere else and use your energy for value-creating results
- Free choice of technical equipment (phone, laptop)
- A great team and the opportunity to take direct responsibility

### Your role:

- You work in the interface between technology and business and translate requirements of our customers and product management into tangible tasks
- You take on responsible tasks, both in internal product development and in varied customer projects
- You perform explorative data analyses and proof-of-concept tests in the environment of our shipzero platform
- You advise our customers in the areas of data structures, analytics and/or data science and facilitate data-driven decisions

### Your profile:

- M.Sc. in a technical or natural science domain and at least one year of practical experience
- You are proficient in SQL, Python and the use of common databases
- You have experience in analyzing large, complex data sets as well as extracting and visualizing decision-relevant information
- You have an entrepreneurial spirit, quick thinking and ideally some experience with sustainability and/or the logistics industry
- You have excellent communication skills in German and English
- And very important: a good sense of humor and fun with new challenges!

We are happy to receive your full application including your availability and salary expectations at [welcome@appanion.com](mailto:welcome@appanion.com)!
